

## FOR IMMEDIATE RELEASE

### Red Sun Farms Setting the New Standard in Greenhouse Housing

Wapakoneta, OH (06/28/2016) – Red Sun Farms invests in VectorBloc housing at their new Wapakoneta greenhouse location.

Red Sun Farms' continued commitment to social responsibility and quality of life are the driving force behind its revolutionary housing investment. Each modular design includes 1,134 square feet of living space complete with two living rooms, two kitchenettes, two bathrooms, and four bedrooms. A minimum of five housing units will be built on the property this September.

Red Sun Farms is the first greenhouse grower to offer these state of the art housing modules. Each unit is limited to eight residents, and will surround a beautiful courtyard for an additional outdoor living space.

“We are setting the bar by creating an environment which creates a sense of community & home. Our plans include an additional unit for our retail partners and customers to stay while visiting on site so they are able to gain first hand insight in the total experience of our operation” , said Paul J Mastronardi, Ohio Greenhouse Operator.

Red Sun Farms is proud to offer this revolutionary living space within their Wapakoneta greenhouse facility this September.

#### ABOUT RED SUN FARMS

Red Sun Farms is proud to be the largest vertically integrated North American Greenhouse grower, ensuring control over every step of the supply chain. Red Sun Farms owns greenhouses in Mexico, USA and Canada. Quality is maintained throughout seed selection, propagation, growing, harvesting, packaging and the transportation to their partner's stores. When you buy from Red Sun Farms, you are buying direct from the grower.
