# 1. REVISION HISTORY

*This section itemizes the changes from the last published version.*

Version No.	Date of Change	Changed By	Summary of Change
Original 1.0	June 2012	Supply Chain Efficiencies Committee	Original document
2.0	2/25/2013	Ed Treacy	<ol style="list-style-type: none"> <li>1. Updated Contributors list</li> <li>2. Reordered attributes listing to move the Produce Industry defined attributes to front of document</li> <li>3. Updated Guidance to Consider: for GTIN</li> <li>4. Updated functionalName code list</li> <li>5. Attribute "variant" changed to "varietyType"</li> <li>6. Updated gradeCode List</li> <li>7. Updated gradeCodeAgency List</li> <li>8. Changed gradeCodeAgency to "Necessary to be PTI Compliant"</li> </ol>

# 1. ABOUT PMA

*The vision of Produce Marketing Association (PMA) is to strengthen and lead the global produce community. The mission of PMA is to connect, to inform, and to deliver business solutions that enhance members' prosperity. PMA's values describe the principles, standards and qualities that we strive to achieve and are common to our global community. These values include Character, Community, and Courage and they guide our behavior and decisions, and set the expectations our members should have for their association.*

## **ABOUT PMA Supply Chain Efficiencies Committee**

*The PMA Supply Chain Efficiencies Committee is a volunteer committee comprised of members of the Produce Marketing Association. The committee provides oversight and guidance on the development and application of supply chain practices that create greater efficiencies throughout produce supply chains.*

## **ACKNOWLEDGEMENTS**

*This guide represents the work of many individuals representing a range of companies across the produce supply chain, including growers, packers, shippers, retailers, brokers, solution providers, third-party service providers and standards organizations. In particular, the work of Scott Brown and Michel Southall of GS1 US and Christina D'Allacco of Produce Marketing Association was indispensable in the development of this guide. Their knowledge of the GS1 standards, patient review, and valuable suggestions added immeasurable value to this resource.*

***Those contributing their time to create, revise, and validate this guide include:***

Alec Leach, Taylor Farms	Doug Thurston, PakSense	Nelson Longenecker, Four Season's Produce
Angela Fernandez, GS1 US	Ed Treacy, Produce Marketing Association	Nelly Yunta, Crowley Liner Services
Brad Henderson, Sobeys Inc.	Elliot Grant, HarvestMark	Phaedra Culjak, TempTRIP, LLC
Bradley Corlew, Murphy Tomatoes	Eric Biddiscombe, Loblaw Companies Ltd.	Phil Dammarell, The Kroger Company
Christina D'Allacco, Produce Marketing Association	George Monahan, Gordon's Food Service	Sally Robinson, Safeway
Dan Martin, Sysco Canada	Greg Corrigan, Raleys	Scott Brown, GS1 US
Dan Vaché, United Fresh Produce Association	Hugh Bowman, Bayshore Vegetables Shippers	Scott Fisher, Food Lion
Dan Vega, Fresh Link Produce	Jane Proctor, Canadian Produce Marketing Association	Susan Moore, Safeway
Daniel Clark, GS1 Canada	Joe Sbrocchi, Mastronardi Produce	Tammy Gainey, Ready Pac Produce, Inc.
David Gill, Gill's Onions	Michele Southall, GS1 US	Teri Miller, Food Lion
Debby Atallah, GS1 Canada	Mike Agostini, Wal-Mart	Tim Gagnon, C H Robinson Worldwide, Inc.
Doug Grant, The Oppenheimer Group	Mike DeYoung, Mastronardi Produce	Tim Jernigan, Seald Sweet
Doug Rosenfeld, Famous Software, LLC	Mike Sadiwnyk, GS1 Canada	Tony Mitchell, Caito Food Services, Inc.
Doug Stoiber, L&M Produce, Inc.	Mikelea Kelley, Tanimura & Antle	

## **TERMS OF USE (DISCLAIMER)**

The information presented in this guide provides member agreed-upon guidance for synchronizing produce trade items utilizing GS1 standards.

Although PMA Supply Chain Efficiencies committee members have made every reasonable effort to ensure that the guidance is accurate and useful, errors may occur. Scenarios may arise in practice or changes can be made to validation rules and attribute relationships by GS1 or other third parties.

Accordingly, PMA or its members assume no risk or liability for any consequences that may be incurred through the use of this guide.

If users identify any errors in the guide or have recommendations to improve the usefulness of this guide, please contact Ed Treacy, Vice President, Supply Chain Efficiencies, Produce Marketing Association at [etreacy@pma.com](mailto:etreacy@pma.com).

Revisions of this guide will be offered periodically to correct identified errors, expand the scope of coverage, and incorporate refinements.

## **PURPOSE OF THE GUIDE**

This guide provides support to companies seeking to electronically synchronize produce product information in accordance with GS1 (EAN.UCC) standards. This guidance applies to the full range of fresh produce trade items. The guide describes which of the defined GS1 attributes should be used for produce items and recommends best practices for the use of these standards to synchronize static produce data between suppliers and retailers. Today, different platforms as well as different means for item identification exist when it comes to data sharing. The use of GS1 standards, specifically for EDI transactions, provides a common platform to help supply chain partners share and understand the same information about products and locations.

This guide is platform neutral and is intended to be used with or without third-party service providers. This guide covers GS1 attributes for Party and Trade Item requirements only. This version is constructed to be consistent with GS1 Business Message Standard (BMS), Version 2.0.3, and Business Requirements Document (BRD) Version 7.7.1 for Trade Item and Party, both released May 24, 2005. References to 'X12' refer to ASC X12 EDI Implementation Guidelines as provided by DISA (Data Interchange Standards Association). Reference to EANCOM refers to EAN International's publication of UN/EDIFACT EDI standards.

### **3. GENERAL GUIDANCE AND TECHNICAL ASSUMPTIONS**

*There are 202 attributes defined by GS1 today for data synchronization in the Global Data Synchronization Network (GDSN) for the produce industry. GDSN is a network of standardized, GS1 certified data pools where all participants in the supply chain can share and synchronize product data. Fresh produce trade items do not require all 202 attributes in order to utilize EDI. This guide is designed to provide guidance for implementing data synchronization for the following commonly used EDI transactions in the produce industry:*

*810 - Invoice*

*820 - Payment Order / Remittance Advice*

*824 - Application Advice*

*850 - Purchase Order*

*855 - Purchase Order Acknowledgement*

*856 - Ship Notice / Manifest*

*875 - Grocery Products Purchase Order*

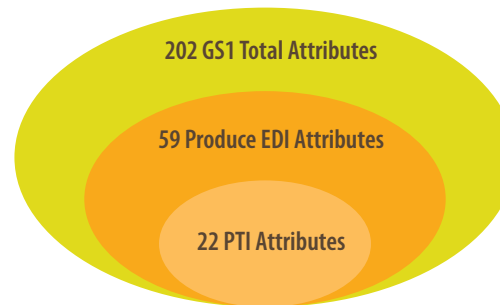

*880 - Grocery Products Invoice*

*888 - Item Maintenance*

*894 - Delivery / Return Base Record*

*997 - Functional Acknowledgement*

*Included in the 59 attributes required for EDI synchronization are the 22 attributes for data synchronization recommended for compliance with the Produce Traceability Initiative (PTI). It is important to note that these attributes are used for the transmission of static master data and not transactional data. Each attribute in this guide will be marked accordingly in the appropriate column to inform the trading partner of the initial setup needs for EDI and those necessary to be PTI compliant.*

## **PRODUCE STANDARDS ATTRIBUTES DEFINITIONS**

*Attributes are used as a means to describe specific information about an item when transacting business. They reflect a certain characteristic about the item such as identifiers, weights, dimensions and manufacturer or supplier information. Attributes can be designated as “Dependent” or “If Class is Invoked” or “Use Only If” depending on the applicability of that attribute for carrying essential information about produce items. All attributes listed and their needs for initial setup for EDI are dependent upon the item maintenance transaction (888) being required.*

## **PRODUCE IMPLEMENTATION GUIDE SYNTAX**

*The fields or values described in this guide for each attribute can be separated into the following categories: Data Type, Produce Industry Attribute Name, Produce Industry Definition, Guidance to Consider; and Example for Attribute Value Entry. The guide also provides information on whether the attribute is needed for initial setup in EDI and PTI data synchronization.*

*Data Type is a set of data with values having predefined characteristics. Examples of data types are date, numeric, text and code list. Each data type typically has a range of values. A code list signifies that there is a list of existing GS1 or Produce Industry defined codes to be used for that attribute entry. When populating attributes with language qualifiers, the supplier has the ability to additionally specify languages and a value for each language by sending multiple occurrences of an attribute for each language needed. These attributes are multi-description fields in which you can have a value for multiple languages. It is a two character alpha code from ISO 630 which identifies the language; e.g., EN for English, FR for French. With the exception of GTIN and GLN, numeric values can have decimals.*

*Produce Industry Attribute Name is the standard GS1 name of the attribute to be used in any data synchronization activities.*

*Produce Industry Definition is the industry definition for that attribute. It provides the Global Data Dictionary (GDD) definition where appropriate with a produce industry viewpoint.*

*Guidance to Consider is simply that. It provides additional information to be considered when entering the data for the specific attribute. This is where the information regarding dependent attributes will be found.*

*Example for Attribute Value Entry shows a sample entry for the produce industry for that attribute value.*

*Note: Where it states 'if class is invoked', attributes are grouped into classes; a logical grouping which contain similar information. It helps to compartmentalize them. If attributes are within the same class, then any other attribute in that class must be populated. The entire group of attributes is required. Once a class is opened, i.e., one of the fields is populated, then the other attributes are invoked and thus must be populated. This information will be located under 'Guidance to Consider'.*

## 4. ATTRIBUTES REQUIRED FOR EDI TRANSACTIONS 810, 820, 824, 850, 855, 856, 875, 880, 888, 894, and 997

### Attribute: *globalTradeItemNumber*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric (14 digits)	globalTradeItemNumber	<p>This is the 14-digit GTIN assigned by the Brand Owner, not necessarily the manufacturer, to the product level being described with the attributes (i.e. case, pack). GTINs may be assigned at all packaging levels where applicable. For example, a distributor or operator may assign the GTINs for their private label products.</p> <p>More information on how to assemble a GTIN can be found at <a href="http://www.gs1us.org/standards/identification_numbers/global_trade_item_number">http://www.gs1us.org/standards/identification_numbers/global_trade_item_number</a>. To validate the correct check digit, use the following link <a href="http://www.gs1us.org/solutions_services/tools/check_digit_calculator">http://www.gs1us.org/solutions_services/tools/check_digit_calculator</a>.</p> <p>To determine the owner of a GTIN in the US, use the following link <a href="http://gepir.gs1.org/V31/xx/">http://gepir.gs1.org/V31/xx/</a>. Otherwise, contact the GS1 Members Organization in your country.</p>	10123456789129	Y	Y	Y

#### Guidance to consider:

*Numerical field with a 14 digit number.*

*The GTIN is linked to the attributes which provide specific details of the products.*

## Attribute: *tradeltemUnitDescriptor*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List (2 Characters)	tradeltemUnitDescriptor	Describes the hierarchical level of the trade item. If have more than one level of packaging hierarchy, would have a separate entry/record for each level of packaging hierarchy. The hierarchical level can be a bin, a case or a consumer unit etc.	CS	Y	N (depends on trading partner agreement)	Y

***This attribute has specific code values to be used in data entry. See below.***

Code Value	Value Name	Definition
EA	BASE_UNIT_OR_EACH	The lowest level of the item hierarchy intended or labeled for individual retail sale.
PK	PACK_OR_INNER_PACK	A logistical unit between case and each. This may be a consumable innerpack (i.e. Carton of Cigarettes) or it may be simply a logistical pack (i.e. dozens of toothbrushes).
CS	CASE	The standard shipping unit level.
PL	PALLET	A pallet is a flat transport structure designed to support a variety of goods in a stable fashion while being lifted by any mobile forklift or other jacking device.
TL	TRANSPORT_LOAD	A logistical unit which, when ordered, can provide a standard quantity of trade items from any other hierarchy level. This level can be used to define truckloads, shipping containers, rail cars, ships, and etc. This level can contain a single GTIN or multiple GTINs.

### ***Guidance to consider:***

*In the produce industry, trade item would include a bin, case or consumer unit. A watermelon bin would be CS for (case). This is also where an 'inner pack' would be defined. If the item is a base level unit and thus tradeltemUnitDescriptor is not relevant only base unit indicator is true, the next lower level/child information must not be populated. For any other level above the base unit, these pieces of information are required. TI/HL information depending on whether or not there is a pallet GTIN will determine which set of attributes are used and where they are populated. QuantityOfTradeLayersPerPallet and quantityOfTradeltemsPerPalletLayer are only valid on the highest level of the hierarchy when there is no pallet hierarchy level. If the item is a consumer level unit (TradeltemUnitDescriptor is not relevant, only consumer unit indicator is true), then net content is required. It is optional in the message for other levels.*

## Attribute: functionalName

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Multidescription (Allows for a language qualifier) (1 to 35 characters)	functionalName	Describes use of the product or service by the consumer. Should help clarify the product classification associated with the GTIN.	Grapefruit	Y	N (based on trade item agreement)	Y

### Guidance to consider:

*This should be the GPC Brick Description. Using the GPC Brick Code chosen to categorize the product associated with the GTIN, enter the appropriate Brick Description. The current listing of GPC Brick Descriptions can be accessed [here](#). If additional Brick Codes are required, please contact PMA Supply Chain Efficiencies Department.*

*This attribute has standard values for data entry. Please see below.*

Brick	Brick Description	PLU Commodity	PLU Variety	PLU
1000007	Nuts/Seeds – Unprepared/Unprocessed (Perishable)	ALMONDS		4924

## Attribute: varietyType

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Multidescription (Allows for a language qualifier) (1 to 35 characters) Free Text	varietyType	Free text field used to identify the variant of the product. Variants are the distinguishing characteristics that differentiate products with the same brand and size including such things as the particular flavor, fragrance, taste.	Grapefruit Ruby/ Red/Pink	Y	N (based on trade item agreement)	Y

### Guidance to consider:

The industry would like to make this attribute a more functioning value as opposed to a free form text field. In doing so, the guidance is to populate the functionalName with the brick description and the varietyType with the PLU Code set of information (i.e., commodity name, variety name and size). This field will have more than one value; e.g., Apple Red Delicious 2 ½ (simply spaces in between the names, no commas). The current listing of PLU Codes can be found at <http://www.plucodes.com>. If populated, functionalName is also required to be populated.

## Attribute: descriptiveSize

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (1 to 35 characters)	descriptiveSize	An alphanumeric size factor the brand owner wishes to communicate to the consumer. For example, Jumbo, Medium, Size B, 88 count, etc. This is a free text field with a limit of 35 characters.	1 LB Ssize B Red Potato	Y	N	Y

### Guidance to consider:

This is a free text field. Standard produce values for UoM and size group can be found below.

**Size of Unit Measure listing:**

IN	Inches
CM	Centimetre
1N	Count
DZ	Dozen
GR	Gram
KG	Kilogram
LT	Litre
ML	Millilitre
OZ	Ounces
PT	Pint
LB	Pounds
QT	Quart
UN	Unit

**Size Group List**

A	Extra Jumbo	Regular	Standard
AA	Extra Large	Round	Stick
AAA	Fancy	Row	Super
And larger	Giant	Select	Super Colossal
And smaller	Head	Senior	Super Jumbo
And up	Jumbo	Shred	Undersize
B	Junior	Shuck	Various
Baby	Large	Size B	Whole
C	Long	Size C	
Choice	Loose	Slice	
Chop	Mammoth	Slice Dice Shred	
Cin & Core	Medium	Stick	
Cin & Trim	Mini	Slice Dice Skin	
Colossal	Minimum	Shred	
Diameter	Mix	Slice Dice Sliver	
Dice	Non A	Slice Dice	
Extra	Other	Wholepeel	
Extra Fancy	Peel	Small	
		Small Fancy	

## Attribute: *packagingTypeCode*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	packagingTypeCode	The code identifying the type of package used as a container of the trade item. A further description of the trade item package. There is no hierarchy being built because it is a flat one line record headed by the case GTIN.	clamshell	Y	N	Y

### Guidance to consider:

*This is a means to say that the consumer unit is a salad bag. For RPCs, need to use the value KTB. The pack type would be on the GTIN at the 'each' level and case type would be on the GTIN at the case level.*

*This attribute has specific code values to be used in data entry. See below.*

### *packagingTypeCode* list:

Value	Description	Definition
AAA	Pallet, Returnable	Pallet, Returnable
BAG	Bag	Bag: A preformed, flexible container, generally enclosed on all but one side, which forms an opening that may or may not be sealed after filling.
BAL	Bale	Bale
BIN	Bin	Bin
BLK	Bulk	Bulk
BOX	Box	Box: A non-specific term used to refer to a rigid, three-dimensional container with closed faces that completely enclose its contents and may be made out of any material. Even though some boxes might be reused or become resealed they could also be disposable depending on the product hierarchy.
BSK	Basket or hamper	Basket or hamper: A semi rigid container usually open at the top traditionally used for gathering, shipping and marketing agricultural products.
BXI	Box, with inner container	Box, with inner container (e.g., tri-wall)

Value	Description	Definition
CAS	Case	Case: A non-specific term for a container designed to hold, house, and sheath or encase its content while protecting it during distribution, storage and/or exhibition. Cases are mostly intended to store and preserve its contents during the product's entire lifetime.
CMS	Clamshell	Clamshell
CNF	Container, Multi-walled, Secured to Warehouse Pallet	Container, Multi-walled, Secured to Warehouse Pallet; e.g., watermelon bin
CNT	Container	Container
CRF	Corner Reinforcement	Corner Reinforcement: Usually in boxes or crates, additional material or components attached to adjacent panels to add support or prevent crushing or separation
CRT	Crate	Crate: A non-specific term usually referring to a rigid three-dimensional container with semi-closed faces that enclose its contents for shipment or storage. Crates could have an open or closed top and may have internal dividers. Even though some crates might be reused or become resealed they could also be disposable depending on the product hierarchy.
CTN	Carton	Carton: A non-specific term for a re-closable container used mostly for perishable foods (e.g., eggs, fruit).
CU	Cup	Cup: A small bowl shaped container for beverages, often with a handle.
GNT	Net	Net: A container of meshwork material made from threads or strips twisted or woven to form a regular pattern with spaces between the threads that is used for holding, carrying, trapping, or confining something.
GPB	Pallet Box	Pallet Box: A three-dimensional container which either has a pallet platform permanently attached at its base or alternatively requires a platform for its handling and storage as due to its constitution it cannot be handled without it. The characteristics of the platform should be specified using the pallet type code list.
GPU	Packed, Unspecified	Packed, Unspecified: Packaging of the product (or products) is currently not on the list. Use this code when no suitable options are available and only while a Change Request is approved for the proper packaging type.
JAR	Jar	Jar: A rigid container made of glass, stone, earthenware, plastic or other appropriate material with a large opening, which is used to store products, (e.g., jams, cosmetics).
KTB	Knockdown Tote Bin	Knockdown Tote Bin (RPC)
LSE	Loose	Loose
LUG	Lug	Lug
MPE	Multipack	Multipack
PCS	Pieces	Pieces

Value	Description	Definition
PWT	Plastic-Wrapped Tray	Plastic-Wrapped Tray
SAK	Sack	Sack
SCS	Suitcase	Suitcase
SLV	Sleeve	Sleeve: A non-rigid container usually made of paper, cardboard or plastic, that is open-ended and is slid over the contents for protection or presentation.
SRW	Shrink Wrap	Shrink Wrap: In packaging, a plastic film around an item or group of items which is heated causing the film to shrink, securing the unit integrity. The use of shrunken film to tightly wrap a package or a unit load in order to bind, protect and immobilize it for further handling or shipping.
TBN	Tote Bin	Tote Bin
TRY	Tray	Tray: A shallow container, which may or may not have a cover, used for displaying or carrying items; e.g., flat.
TUB	Tub	Tub: Generally, a round flat-bottomed container closed with a large lid, typically used to contain ice cream, margarine, sour cream, confections, and other products.
UNP	Unpacked	Unpacked: The item is provided without packaging.
UVQ	Wrapped in Plastic	Wrapped in Plastic
WRP	Wrapped	Wrapped: The process of enclosing all or part of an item with layers of flexible wrapping material (e.g., for an individually packed ice cream). Does not include items which are shrink-wrapped or vacuum-packed.

## Attribute: gradeCode

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (1 to 35 characters)	gradeCode	A code indicating the degree of refinement, features and capabilities for a trade item. An accepted level or standard to determine the quality of fresh produce. Quality grades provide a common language among buyers and sellers, which in turn assures consistent quality for consumers.	Washington Extra Fancy	Y	N	Y

### Guidance to consider:

*This is a free text field. Refer to the standard produce industry values below. This field is mandatory if the class is invoked.*

### gradeCode list:

<i>California Extra Fancy</i>	<i>Canada No. 2 Picklers</i>	<i>US Extra Fancy Table</i>	<i>US No. 1 Husked</i>	<i>US No. 2 Spanish</i>
<i>California Fancy</i>	<i>Canada Orchard Run</i>	<i>US Extra Large Virginia</i>	<i>US No. 1 Institutional</i>	<i>US No. 2 Virginia</i>
<i>Canada Commercial</i>	<i>Choice</i>	<i>US Extra No. 1</i>	<i>US No. 1 Large</i>	<i>US No. 3</i>
<i>Canada Domestic</i>	<i>Class 1</i>	<i>US Extra No. 1 Jumbo</i>	<i>US No. 1 Mixed</i>	<i>US Runner Splits</i>
<i>Canada Hailed</i>	<i>Combination</i>	<i>US Fancy</i>	<i>US No. 1 Pieces</i>	<i>US Select</i>
<i>Canada No. 1</i>	<i>Extra Fancy</i>	<i>US Fancy Hand Picked</i>	<i>US No. 1 Runner</i>	<i>US Select Sheller Run</i>
<i>Canada No. 1 Chef</i>	<i>Fancy</i>	<i>US Fancy Husked</i>	<i>US No. 1 Small</i>	<i>US Spanish Splits</i>
<i>Canada No. 1 Extra Large</i>	<i>Premium</i>	<i>US Fancy Table</i>	<i>US No. 1 Spanish</i>	<i>US Standard Sheller Run</i>
<i>Canada No. 1 Heart</i>	<i>Standard</i>	<i>US Good Delivery Standards</i>	<i>US No. 1 Table</i>	<i>US Super Fancy</i>
<i>Canada No. 1 Large</i>	<i>Unclassified</i>	<i>US Jumbo Hand Picked</i>	<i>US No. 1 Virginia</i>	<i>US Virginia Splits</i>
<i>Canada No. 1 Picklers</i>	<i>US Combination</i>	<i>US Medium Virginia</i>	<i>US No. 1 Whole and Broken</i>	<i>Utility</i>
<i>Canada No. 1 Pickling</i>	<i>US Commercial</i>	<i>US No Grade Contract</i>	<i>US No. 2</i>	<i>Washington Extra Fancy</i>
<i>Canada No. 1 Slender</i>	<i>US Export No. 1</i>	<i>US No. 1</i>	<i>US No. 2 Mixed</i>	<i>Washington Extra Fancy Premium</i>
<i>Canada No. 2</i>	<i>US Extra Fancy</i>	<i>US No. 1 Golden</i>	<i>US No. 2 Runner</i>	<i>Washington Fancy</i>

## Attribute: gradeCodeAgency

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (1 to 70 characters)	gradeCodeAgency	An agency that manages a grade code list; for example USDA	USDA	Y	N	N

### Guidance to consider:

*This field is optional and a free text field.*

*Refer to standard produce industry grade code agency values below.*

### gradeCodeAgency list:

USDA - US Department of Agriculture
CFIA - Canadian Food Inspection Agency
Codex

## Attribute: *growingMethodCode*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	growingMethodCode	The process through which fresh produce is grown and cultivated.	Conventional	Y	N	Y

### Guidance to consider:

*If multiple growing methods are used, they would be entered as repeat fields for XML, not comma delimited fields. If populated, requires the population of ingredientSequence and ingredientName.*

*This attribute has specific code values to be used in data entry. See below.*

**growingMethodCode list:**

Value	Definition
CONVENTIONAL	Foods grown non-organically, either indoors or outdoors without any special processes.
FIELD_GROWN	Plants grown outdoors
FLY_FREE	Citrus grown in an area certified to be free of all Caribbean Fruit Flies based on trappings
GREENHOUSE	Plants that are grown and cultivated in an indoor covered place.
HYDROPONIC	Plants grown using mineral nutrient solutions instead of soil.
INTEGRATED_PEST_MANAGEMENT	(IPM) Plants grown using a pest control strategy that uses an array of complimentary methods: mechanical devices, physical devices, genetic, biological, legal, cultural management and chemical management. These methods are done in three stages: prevention, observation, and intervention. It is an ecological approach with a main goal of significantly reducing or eliminating the use of pesticides.
CLONED_FOODS	The product was created through the process of making a genetically identical copy of another instance of this product. To clone an organism, a DNA sequence, such as a gene, is transferred from one organism to another thereby the offspring is an identical copy of the original.
SUSTAINABLE	A method of growing a food using processes that are non-polluting and conserve energy and natural resources. This claim should be used in accordance with any regulation of the target market.
SHADE_GROWN	Produce which has been grown under shade or grown under cloth.
ORGANIC	Produce which has been grown organically.

## Attribute: *tradeltemDescription*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Multidescription (Allows for a language qualifier) (1 to 178 characters) Free Text	tradeltemDescription	A description of the product. This field has a language qualifier, 1-178.	Ruby Red Grapefruit Florida U.S. #1	Y	N (based on trade item agreement)	Y

### Guidance to consider:

*This field is to be used by the supplier to describe the product. It has a 178 character limit. This is not mandatory if using short description and additionalTradeltemDescription. Industry trend is that retailers use short description and trade item description for reference only, not as direct input. It is suggested to use this field or additionalTradeltemDescription field for treatment values (e.g., ethylene treated, waxed, residue free). Could also use this field for commodity/variety and/or pack style (e.g., pyramid box). If populated, must populate functionalName.*

## Attribute: additionalTradeItemIdentificationType

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	additionalTradeItemIdentificationType	Type of the identification system that is being used as an alternative to the Global Trade Item Number. This is the source of the additional item identification (SKU, Product ID, etc.) If the identification is the supplier's internal product identification number, select SUPPLIER_ASSIGNED. If it is the distributor's internal product identification number, select DISTRIBUTOR_ASSIGNED. This field can be repeated as necessary in conjunction with the additionalTradeItemIdentificationValue.	PLU	Y	N	N

### Guidance to consider:

The code type, e.g., PLU, would be entered here and the corresponding 4 or 5 digit code would be entered in the additionalTradeItemIdentificationValue field. If populated, requires the population of additionalTradeItemIdentificationValue.

This attribute has specific code values to be used in data entry. See below.

### additionalTradeItemIdentificationType list:

Value	Definition
BUYER_ASSIGNED	Buyer Defined
DISTRIBUTOR_ASSIGNED	The additional Trade Item Identification value populated has been developed and assigned by an entity which purchases and takes title to goods which are then resold / redistributed elsewhere.
PLU	A number used to indicate a price look up for an existing random weight item. This is only used for items that have been assigned an industry PLU or proprietary PLU and that are utilized through a weighing system through the scales at the back or the front end (at point-of-sale).
SUPPLIER_ASSIGNED	The additional Trade Item Identification value populated has been developed and assigned by the party which provides service(s) and/or manufactures or otherwise has possession the goods and consigns or makes them available in trade.

## Attribute: *additionalTradeItemIdentificationValue*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Free Text (1 to 80 Characters)	<i>additionalTradeItemIdentificationValue</i>	Alternative means to the Global Trade Item Number to identify a trade item. This field can be repeated as necessary in conjunction with the <i>additionalTradeItemIdentificationType</i> .	4032	Y	N	N

### Guidance to consider:

*Whatever trade item identification type is used, the corresponding number would be entered in this field.*

*If populated, requires the population of *additionalTradeItemIdentificationType*.*

## Attribute: additionalTradeltemDescription

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Multidescription (Allows for a language qualifier) (1 to 350 characters) Free Text	additionalTradeltemDescription	Additional variants necessary to communicate to the industry to help define the product. Multiple variants can be established for each GTIN. This is a repeatable field, e.g., Style, Color, and Fragrance. The schema uses common library component as shown in the GDD (Global Data Dictionary) Max Size field. For the business requirements for item, please use the specific definition of this data type and field, 1-350.	Joe's Farm Red Seedless Watermelon 45 count 24" bin US #1	Y	N (based on trade item agreement)	N

### Guidance to consider:

*Free form text field with 350 character limit. This field gives the trading partner another space where they can give an unadulterated description. Consider that retailers may use this field as well as short description. This field is optional if use descriptionShort and tradeltemDescription. Could use this field for product treatment (e.g., ethylene treated, waxed, residue free). Could also use this field for commodity/variety and/or pack style.*

*If populated, requires the population of functionalName.*

## Attribute: maturityMethodAtTimeOfSale

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	maturityMethodAtTimeOfSale	Method of maturity of item.	Tree/Vine Ripe	Y	N	N

### Guidance to consider:

*This attribute has specific code values to be used in data entry. See below.*

### maturityMethodAtTimeOfSale list:

Maturity
Pre-conditioned
Tree/Vine Ripe
Jet Fresh

## Attribute: *organicTradeltemCode*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	organicTradeltemCode	Used to indicate the organic status of a trade item or of one or more of its components.	1	Y	N	N

### Guidance to consider:

If *growingMethodCode* is "ORGANIC", then *organicClaimAgency* and *organicTradeltemCode* must be populated. This is a free text field. Refer to the guidance under the attribute, *growingMethodCode*.

*Mandatory - If class is invoked, the class can be repeated.*

*Refer to standard produce industry values here.*

### *organicTradeltemCode* list:

Value	Description
1	100% Organic
2	Organic (at least 95% by weight)
3	Made with organic ingredients (at least 70% by weight)
4	Some organic ingredients (less than 70% by weight)
5	Not Organic
6	In conversion (products presently in conversion to the organic standard)
7	Bio Dynamic (a cousin to the organic system)
8	Disqualified (GTINs that violate organic principles, with attributes such as <i>isTradeltemGeneticallyModified</i> or <i>isTradeltemIrradiated</i> being true.)

## Attribute: *organicClaimAgency*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	<i>organicClaimAgency</i>	A governing body that creates and maintains standards related to organic products.	6	Y	N	N

### Guidance to consider:

If *growingMethodCode* is "ORGANIC", then *organicClaimAgency* and *organicTradeltemCode* must be populated. Organic claim agencies have been identified and standard values used are listed here. This is a free text field.

*Mandatory* - If class is invoked, the class can be repeated.

This attribute has standard produce industry code values to be used in data entry. See below. The CFIA and USDA are hyperlinks to their individual websites.

### *organicClaimAgency* list:

Value	Description
1	EPA - US Environmental Protection Agency
2	FSA - UK Food Standards Agency
3	FDA - US Food and Drug Agency
4	International Foundation for Organic Agriculture
5	BFA - Biological Farmers of Australia
6	CFIA - Canadian Food Inspection Agency
7	USDA - United States Department of Agriculture

## Attribute: brandName

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (1 to 35 characters) Free Text	brandName	The recognizable name used by a brand owner to uniquely identify a line of trade item or services. This is recognizable by the consumer or by the trade (buyer)	Andy Boy	Y	N (depends on trading partner agreement)	Y

### Guidance to consider:

*The Brand Name and the Brand Owner's Name can be different; e.g., Andy Boy and D'Arrigo Brothers of NY*

## Attribute: nameOfBrandOwner

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (1 to 35 characters) Free Text	nameOfBrandOwner	This is the name of the company that owns the brand.  For example, D'Arrigo Bros. owns Andy Boy brand so the value entered for Brand Owner is D'Arrigo Bros. where Andy Boy is the brand name.	D'Arrigo Bros.	Y	N	N

### Guidance to consider:

Free text field of up to 35 characters; human readable. If populated, it is mandatory that brandOwner(GLN) or additionalBrandOwnerIdentificationValue are populated.

Please refer to the nameOfBrandOwner example below to show how this field would be populated, not the actual values.

### nameOfBrandOwner examples:

**For Example:** Company A is a citrus packer who packs navel oranges. In this example, Company A would be populated as the manufacturer, and navel oranges would be used for the Case, Inner Pack and/or Each GTIN level. Company A is Information Provider, Brand Owner, and Packer.

This is an example of a navel packer packing under its own label.

Package Description	GTIN	Product Description- Short	Information Provider GLN	Information Provider	Brand Owner GLN	Brand Owner	Manufacturer / PackerGLN	Manufacturer/Packer
Case	31234567891102	8 x 5lb bags navel orange	123456000018	Company A	123456000018	Company A	123456000018	Company A
Inner Pack	21234567891105	5 lb navel orange	123456000018	Company A	123456000018	Company A	123456000018	Company A
Each (Retail Selling Unit)	1234567891101	navel orange (PLU code and size)	123456000018	Company A	123456000018	Company A	123456000018	Company A

*For its navel oranges, produce retailer contracts with citrus packing company to physically pack their private label citrus products using the retailer GTINS. The product specifications are controlled by the produce retailer even though the citrus packer packs the product. Produce retailer is listed on the package as the brand owner. In this example, produce retailer would be populated as the packer/manufacturer. Produce retailer requires packer to use produce retailer GTIN. Information Provider and Brand Owner is produce retailer and Packer is citrus packing company.*

*This is an example of a private label with a retailer GTIN.*

Package Description	GTIN	Product Description- Short	Information Provider GLN	Information Provider	Brand Owner GLN	Brand Owner	Manufacturer / PackerGLN	Manufacturer/Packer

Inner Pack	21234567891105	5 lb navel orange	123456000018	Produce Retailer	123456000018	Produce Retailer	123456000018	Produce Retailer
Each (Retail Selling Unit)	1234567891101	navel orange (PLU code and size)	123456000018	Produce Retailer	123456000018	Produce Retailer	123456000018	Produce Retailer

*For its navel oranges, produce retailer contracts with citrus packer to pack the product under the produce retailer brand name. The product specifications and physical packing process are controlled by citrus packer. Citrus packer is listed on the packaging as the manufacturer/packer. In this example, citrus packer would be populated as the manufacturer. Produce retailer required packer to use packers GTIN. Information Provider is produce retailer, Brand Owner is produce retailer and Manufacturer/Packer is citrus packer.*

*This is an example of a private label with a packer GTIN.*

*For its navel oranges, wholesaler purchases oranges from citrus packer. Wholesaler acts as a distributor of citrus packer’s oranges. The packaging states that citrus packer is the brand owner. In this example, citrus packer would be populated as the manufacturer/packer, with citrus packer’s GLN. Information provider is wholesaler, Brand owner and Manufacture/Packer is citrus packer.*

*This is an example of a wholesaler/distributor.*

## Attribute: *additionalBrandOwnerIdentificationType*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI Transactions (all dependent on farm maintenance (888) being required)	Transactional Fields for EDI (all dependent on farm maintenance (888) being required)	Necessary to be PTI Compliant
Code List	additionalBrandOwnerIdentificationType	Code used to identify additional brand owner identification value.	DUNS	Y	N	N

### Guidance to consider:

Choose the value that best describes the identification type you're using for brand owner if not using GLN. This value should correlate with the number entered in *additionalBrandOwnerIdentificationValue*; e.g., DUNS.

This attribute has specific code values to be used in data entry. See below.

### *additionalBrandOwnerIdentificationType* list:

Value
BUYER_ASSIGNED_IDENTIFIER_FOR_A_PARTY
DUNS
DUNS_PLUS_FOUR
SELLER_ASSIGNED_IDENTIFIER_FOR_A_PARTY
USDA_ESTABLISHMENT_NUMBER

## Attribute: additionalBrandOwnerIdentificationValue

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric	additionalBrandOwnerIdentificationValue	Number used to identify the brand owner when not using GLN. May or may not be the same entity as the information provider.	1234567891111	Y	N	N

### Guidance to consider:

*This is the actual number or value relating to the additional brand owner identification; eg., DUNS #.*

## Attribute: *tradeltemCountryOfOrigin*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List (3 Characters)	tradeltemCountryOfOrigin	The Country of Origin is the list of all potential countries the item could be grown in. It is the actual Country of Origin for each transaction to be exchanged via transactional data. This entry should represent the actual country of origin where the item is grown. If a consumer unit contains a mix of produce from different countries, then all countries need to be listed.	840	Y	Y	Y

*This attribute has specific code values to be used in data entry. See the allowed values below.*

*This is a sample of the 3 digit ISO Numerical Code for Country Codes.*

*Please reference <http://unstats.un.org/unsd/methods/m49/m49alpha.htm> for a current country code list.*

### Guidance to consider:

*Can list multiple countries using repeat fields for XML (not comma delimited). Retailers need to pick up Country of Origin (COO) from transactional data.*

## Attribute: classificationCategoryCode

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List (10 characters)	classificationCategoryCode	This is the GPC Brick Code. It classifies the type of produce, the category of produce and the commodity itself.	10006037	Y	N	N

### Guidance to consider:

To provide a classification of what the item is, use of the Global Product Classification (GPC) codes has been adopted. This classification system will help to provide more detail linking similar products together for comparisons. The GPC is a multi-level system. However, this attribute should be populated with the GPC Brick Code which best classifies the product. There should be one and only one GPC Brick Code for an item.

### classificationCategoryCode list:

Please see <http://www.gs1.org/services/gsm/kc/gpc/index.html> for a current listing of GPCs for all industries.

Brick Code	Brick Description
10000003	Fruit – Unprepared/Unprocessed (Shelf Stable)

## Attribute: width & UoM

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric (Round up to 3 Decimals)	width & UoM	The measurement from left to right of the trade item. Measurements are relative to how the customer normally views the trade item. Needs to be associated with a valid UoM.	40	Y	N	Y
Code List (up to 3 Characters)			IN			

*This attribute has specific code values to be used in data entry. See below.*

### Guidance to consider:

*Width: This field is the numeric value.*

*UoM: This field is for the Unit of Measure. For any measurements non-US, use the metric values.*

### Width & UoM list:

Code Value	Code Name
CM	Centimetre
IN	Inches
MM	Millimetre
FT	Feet
DK	Kilometre
LF	Linear Foot
LM	Linear Metre
YD	Yard

## Attribute: height & UoM

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric (Round up to 3 Decimals)	height & UoM	The measurement of the height of the trade item. The vertical dimension from the lowest extremity to the highest extremity, including packaging. At a pallet level the trade item height will include the height of the pallet itself. Measurements are relative to how the customer normally views the trade item. Needs to be associated with a valid UoM.	24	Y	N	Y
Code List (up to 3 Characters)			IN			

*This attribute has specific code values to be used in data entry. See below.*

### Guidance to consider:

*Height: This field is the numeric value.*

*UoM: This field is for the Unit of Measure found in the list above. For any measurements non-US, use the metric values.*

### height & UoM list:

Code Value	Code Name
CM	Centimetre
IN	Inches
MM	Millimetre
FT	Feet
DK	Kilometre
LF	Linear Foot
LM	Linear Metre
YD	Yard

## Attribute: depth & UoM

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric (Round up to 3 Decimals)	depth & UoM	The measurement from front to back of the trade item. Measurements are relative to how the customer normally views the trade item. Needs to be associated with a valid UoM.	48	Y	N	Y
Code List (up to 3 Characters)			IN			

*This attribute has specific code values to be used in data entry. See below.*

### Guidance to consider:

*Depth: This field is the numeric value.*

*UoM: This field is for the Unit of Measure. For any measurements non-US, use the metric values.*

### Depth & UoM list:

Code Value	Code Name
CM	Centimetre
IN	Inches
MM	Millimetre
FT	Feet
DK	Kilometre
LF	Linear Foot
LM	Linear Metre

## Attribute: grossWeight & UoM

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric (Round up to 3 Decimals)	grossWeight & UoM	This would be the sum of the net weight of the product plus the tare weight of the packaging. Refer to the examples under the PMA Value List column for gross weight.	880	Y	Y	Y
Code List (up to 3 Characters)			LB			

### Guidance to consider:

The gross weight field is the numeric value and the UoM field is for the Unit of Measure listed below. For any measurements non-US, use the metric values.

This attribute has specific code values to be used in data entry. Examples are also provided for gross weight, net weight and net content. See both below.

### grossWeight & UoM list:

Code Value	Code Name
26	Actual Ton
BU	Bushel
GR	Gram

Code Value	Code Name
GT	Gross Kilogram
KG	Kilogram
LT	Litre

Code Value	Code Name
ML	Millimetre
58	Net Kilograms
OZ	Ounces

Code Value	Code Name
PT	Pint
PG	Pound Gross
LB	Pounds

Code Value	Code Name
PE	Pounds Equivalent
PN	Pounds Net
QT	Quart

**grossWeight & UoM calculation example:**

**Example in Imperial Measure – Net Content Expressed as Weight**

*For the each, there is a Net Content of 1 pound and packaging weighing 0.2 pounds.*

*For the case, there is 1 pound of extra packaging, in addition to the packaging on the Eaches.*

*For the pallet, there is 50 pounds of extra packaging, in addition to the packaging on the Cases and Eaches.*

GTIN	Trade Item Unit Descriptor	Total Quantity of Next Lower Level Trade Item	Net Measurement				Gross Measurement	
			Net Content	Net Content UoM	Net Weight	Net Weight UoM	Gross Weight	Gross Weight UoM

**netWeight & UoM calculation example:**

**Example in Imperial Measure – Net Content Expressed as Weight**

*For the each, there is a Net Content of 1 pound and packaging weighing 0.2 pounds.*

*For the case, there is 1 pound of extra packaging, in addition to the packaging on the Eaches.*

*For the pallet, there is 50 pounds of extra packaging, in addition to the packaging on the Cases and Eaches.*

GTIN	Trade Item Unit Descriptor	Total Quantity of Next Lower Level Trade Item	Net Measurement				Gross Measurement	
			Net Content	Net Content UoM	Net Weight	Net Weight UoM	Gross Weight	Gross Weight UoM
07612345678924	Pallet	100			1000	LB	1350	LB
10012345789004	Case	10			10	LB	13	LB
00012345789007	Each	n/a	1	LB			1.2	LB

**Example in Imperial Measure – Net Content Expressed as an Each**

*For the each, there is a Net Content of 1 EA , and packaging weighing 0.5 pounds.*

*For the case, there is 1 pound of extra packaging, in addition to the packaging on the Eaches.*

*For the pallet, there is 15 pounds of extra packaging, in addition to the packaging on the Cases and Eaches.*

GTIN	Trade Item Unit Descriptor	Total Quantity of Next Lower Level Trade Item	Net Measurement				Gross Measurement	
			Net Content	Net Content UoM	Net Weight	Net Weight UoM	Gross Weight	Gross Weight UoM
07612345543239	Pallet	100			200	LB	515	LB
07612345543222	Case	4			2	LB	5	LB
07612345543215	Each	n/a	1	EA			1	LB

## Attribute: netContent & UoM

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric (Round up to 3 Decimals)	netContent & UoM	<p>The total declared weight, volume or content on the package. This field can be repeated to accommodate several values as necessary.</p> <p>The net content is required when the GTIN is marked as being a consumer unit. It is the sellable unit to the consumer.</p> <p>This attribute may be required by some trading partners for their individual business practices.</p>	8	Y	Y	Y
Code List (up to 3 Characters)			LB, clamshell or each			
			Using a flat of strawberries as an example, if net content is populated at the case GTIN level (e.g., flat of strawberries), the net content could be the number of pints or clamshells, and/or weight of the strawberries without packaging. At the each GTIN level (e.g., pint), the net content could be one pint, one each and/or weight.			

### Guidance to consider:

**Net Content:** This field is the numeric value. Examples are listed to help the industry understand the interplay between gross weight, net weight and net content.

**Net Content** is the declared content that is on the package (the sellable unit to the consumer). It is required when the GTIN is marked as being the consumer unit.

**UoM:** This field is for the Unit of Measure. For any measurements non-US, use the metric values. For designation of size in the produce industry, use 'count' as UoM.

This attribute has specific code values to be used in data entry. See below. Examples are also provided for gross weight, net weight and net content also shown below.

Code Value	Code Name
26	Actual Ton
AS	Assortment
BG	Bag
BA	Bale
BX	Box
BN	Bulk
BU	Bushel
CT	Carton

Code Value	Code Name

07612345543215	Each	n/a	1	EA			1	LB

## Attribute: quantityOfLayersPerPallet

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Integer	quantityOfLayersPerPallet	This would be the number of layers for a full pallet; for example the produce industry predominately uses the GMA 48x40 pallet for one product. The attribute would be the total number of layers for a pallet or the "HI". These are populated on the highest non-Pallet GTIN in the hierarchy.	4	Y	N (as long as GTIN is not required)	Y

### Guidance to consider:

Do not use this field if you have multiple pallets. Use only if NO pallet GTIN has been assigned. If populated, population of quantityOfTradeltemsPerPallet and quantityOfTradeltemsPerPalletLayer is required.

## Attribute: quantityOfTradeltemsPerPalletLayer

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Integer	quantityOfTradeltemsPerPalletLayer	This is the number of shipping containers (highest level GTIN) per layer on the pallet. The produce industry predominately uses the GMA 48x40 pallet. The attribute would be the total number of products per layer of the pallet or the "TI". These are populated on the highest non-Pallet GTIN in the hierarchy.	1	Y	N (as long as GTIN is not required)	Y

### Guidance to consider:

Do not use this field if you have multiple pallets. Use only if NO pallet GTIN has been assigned. If populated, population of quantityOfLayersPerPallet and quantityOfTradeltemsPerPallet is required.

## Attribute: quantityOfNextLowerLevelTradeItem

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Integer	quantityOfNextLowerLevelTradeItem	The number of next lower level trade item that this trade item contains. This applies to a specific child GTIN and denotes how many of that child there are.	45	Y	N	Y

### Guidance to consider:

If a pallet GTIN is not assigned, but shipping by the pallet, you need to use this field to describe the contents of the pallet (TI & HI). Only use if have a multi-level hierarchy. In a case where there is only one child (e.g., only an apple), then totalQuantityOfNextLowerLevelTradeItem and quantityOfNextLowerLevelTradeItem would be the same. However, should a case have 2 child GTINs (e.g., an apple and an orange), then totalQuantityOfNextLowerLevelTradeItem would be the sum of the apples AND the oranges. And quantityOfNextLowerLevelTradeItem would be listed under the apple GTIN as how many apples, and under the orange GTIN as how many oranges.

## Attribute: effectiveDate

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Date (CCYY-MM-DDTHH:MM:SS)	effectiveDate	This field is the date the data becomes effective.	2011-08-27T00:00:00	Y (refers to data)	N	Y

### Guidance to consider:

This date refers to the date the data is available. It can be populated by the Information Provider as the current date or any date into the future. Population of a date into the future signifies that the data is not effective for use until that date and recipients should use the currently synchronized data until this date.

## Attribute: startAvailabilityDateTime

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Date (CCYY-MM-DDTHH:MM:SS)	startAvailabilityDateTime	The date from which the trade item becomes available from the manufacturer, including seasonal or temporary trade item and services. This is the date when orders can first be placed.	2011-08-27T00:00:00	Y	N	N

### Guidance to consider:

*Dates can be in the future. The date might be transacted more than once due to seasonality availability; start availability dates can be the same as the effective date but do not have to be.*

## Attribute: lastChangeDateTime

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Date (CCYY-MM-DDTHH:MM:SS)	lastChangeDateTime	Indicates the point in time when the last modification on a Trade Item was made.	2011-08-30T25:10:00	Y	N	N

## Attribute: quantityOfCompleteLayersContainedInTradeltem

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Integer	quantityOfCompleteLayersContainedInTradeltem	Do not use this attribute unless you have assigned a GTIN to the pallet level of the hierarchy and the pallet is an orderable and invoice unit of measure. This is only populated on the Pallet GTIN.	N/A - only used if assigning GTIN to pallet	Y	N (as long as GTIN is not required)	N

### Guidance to consider:

*It is not recommended to assign GTINs to pallet level at this time; only recommended if assigning GTINs to pallets (if have different pallet configurations).*

## Attribute: quantityOfTradeltemsContainedInACompleteLayer

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Integer	quantityOfTradeltemsContainedInACompleteLayer	Do not use this attribute unless you have assigned a GTIN to the pallet level of the hierarchy and the pallet is an orderable and invoice unit of measure. This is only populated on the Pallet GTIN.	N/A - only used if assigning GTIN to pallet	Y	N (as long as GTIN is not required)	N

### Guidance to consider:

*It is not recommended to assign GTINs to pallet level at this time; only recommended if assigning GTINs to pallets (if have different pallet configurations).*

## Attribute: quantityOfTradeItemsPerPallet

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Integer	quantityOfTradeItemsPerPallet	This is total number of units on a pallet (should be TI x HI)	1	Y	N (as long as GTIN is not required)	N

### Guidance to consider:

*Input the numerical value for TI x HI. This field is required so that the recipient can know the total on a pallet when it does not have a GTIN.*

*Use only if NO Pallet GTIN has been assigned.*

*If populated, requires population of quantityOfLayersPerPallet, and quantityOfTradeItemsPerPalletLayer.*

## Attribute: nameOfInformationProvider

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (1 to 35 characters) Free Text	nameOfInformationProvider	Name of the party who owns the data. Name of the information provider on the trade item.	D'Arrigo Bros. Co. of NY, Inc.	Y	N	N

### Guidance to consider:

*This is a human readable free text field of up to 35 characters. If populated, it is mandatory to populate the attribute field, informationProviderOfTradeItem(GLN).*

*Please refer to the nameOfInformationProvider examples below of how this field would be populated, not the actual values.*

### nameOfInformationProvider examples:

**For example:** *Company A is a citrus packer who packs navel oranges. In this example, Company A would be populated as the manufacturer. And navel oranges would be used for the Case, Inner Pack and/or Each GTIN level. Company A is Information Provider, Brand Owner, and Packer.*

*This is an example of a navel packer packing under its own label.*

Package Description	GTIN	Product Description- Short	Information Provider GLN	Information Provider	Brand Owner GLN	Brand Owner	Manufacturer / PackerGLN	Manufacturer/Packer
Case	31234567891102	8 x 5lb bags navel orange	123456000018	Company A	123456000018	Company A	123456000018	Company A
Inner Pack	21234567891105	5 lb navel orange	123456000018	Company A	123456000018	Company A	123456000018	Company A
Each (Retail Selling Unit)	1234567891101	navel orange (PLU code and size)	123456000018	Company A	123456000018	Company A	123456000018	Company A

*For its navel oranges, produce retailer contracts with citrus packing company to physically pack their private label citrus products using the retailer GTINS. The product specifications are controlled by the produce retailer even though the citrus packer packs the product. Produce retailer is listed on the package as the brand owner. In this example, produce retailer would be populated as the packer/manufacturer. Produce retailer requires packer to use produce retailer GTIN. Information Provider and Brand Owner is produce retailer and Packer is citrus packing company.*

*This is an example of a private label with a retailer GTIN.*

Package Description	GTIN	Product Description- Short	Information Provider GLN	Information Provider	Brand Owner GLN	Brand Owner	Manufacturer / PackerGLN	Manufacturer/Packer

### Attribute: informationProviderOfTradeItem(GLN)

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric (13 digits)	informationProviderOfTradeItem (GLN)	<p>Unique location number (Global Location Number or GLN) identifying the the data source. This GLN may not be the same as the brand owner, specifically in the case of private label brands. It is the GLN for the provider of the product information which may or may not be the GTIN owner.</p> <p>More information on how to assemble a GLN can be found at <a href="http://bit.ly/MVPgOA">http://bit.ly/MVPgOA</a>.</p> <p>To validate the correct check digit, use the following link <a href="http://bit.ly/LYZJHZ">http://bit.ly/LYZJHZ</a>.</p> <p>To determine the owner of a GLN, use the following link <a href="http://gepir.gs1.org/">http://gepir.gs1.org/</a>.</p>	1012345678919	Y	N	N

#### Guidance to consider:

*It is mandatory to populate nameOfInformationProvider if this field is populated. Use the field additionalInformationProviderOfTradeItemIdentificationValue if not using GLN.*

*Please refer to the informationProviderOfTradeItem examples below of how this field would be populated, not the actual values that should be entered in this field.*

**informationProviderOfTradeItem(GLN) examples:**

**For example:** Company A is a citrus packer who packs navel oranges. In this example, Company A would be populated as the manufacturer. And navel oranges would be used for the Case, Inner Pack and/or Each GTIN level. Company A is Information Provider, Brand Owner, and Packer.

This is an example of a navel packer packing under its own label.

Package Description	GTIN	Product Description- Short	Information Provider GLN	Information Provider	Brand Owner GLN	Brand Owner	Manufacturer / PackerGLN	Manufacturer/Packer
Case	31234567891102	8 x 5lb bags navel orange	123456000018	Company A	123456000018	Company A	123456000018	Company A
Inner Pack	21234567891105	5 lb navel orange	123456000018	Company A	123456000018	Company A	123456000018	Company A
Each (Retail Selling Unit)	1234567891101	navel orange (PLU code and size)	123456000018	Company A	123456000018	Company A	123456000018	Company A

For its navel oranges, produce retailer contracts with citrus packing company to physically pack their private label citrus products using the retailer GTINS. The product specifications are controlled by the produce retailer even though the citrus packer packs the product. Produce retailer is listed on the package as the brand owner. In this example, produce retailer would be populated as the packer/manufacturer. Produce retailer requires packer to use produce retailer GTIN. Information Provider and Brand Owner is produce retailer and Packer is citrus packing company.

This is an example of a private label with a retailer GTIN.

## Attribute: additionalInformationProviderOfTradeItemIdentificationType

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	additionalInformationProviderOfTradeItemIdentificationType	Code used to identify additional information provider of trade item.	DUNS	Y	N	N

### Guidance to consider:

Choose the value that best describes the identification type you're using for the information provider; correlates with what is entered for additionalInformationProviderOfTradeItemIdentificationValue.

This attribute has specific code values to be used in data entry. See below.

### additionalInformationProviderOfTradeItemIdentificationType list:

Value
BUYER_ASSIGNED_IDENTIFIER_FOR_A_PARTY
DUNS
DUNS_PLUS_FOUR
SELLER_ASSIGNED_IDENTIFIER_FOR_A_PARTY
USDA_ESTABLISHMENT_NUMBER

## Attribute: additionalInformationProviderOfTradeItemIdentificationValue

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Numeric	additionalInformationProviderOfTradeItemIdentificationValue	Number used to identify the information provider of the trade item when not using GLN. May or may not be the same entity as the brand owner.	1234567891112	Y	N	N

### Guidance to consider:

*This is the actual number relating to the additional information provider of the trade item e.g., DUNS #*

## Attribute: nameOfManufacturer

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (1 to 35 characters) Free Text	nameOfManufacturer	This is the name(s) of the company which is responsible for the manufacturing process. This field can be repeated as necessary in conjunction with the Manufacturer GLN.	Leger & Son	Y	N	N

### Guidance to consider:

Examples of how fields would be populated are listed below, not the actual values; the name that goes in this field must correspond to the GLN or other identifier, like the DUNS number. Assumption is made that the manufacturer is the grower of the product. If populated, population of manufacturer (GLN) is also required.

### nameOfManufacturer examples:

**For example:** Company A is a citrus packer who packs navel oranges. In this example, Company A would be populated as the manufacturer. And navel oranges would be used for the Case, Inner Pack and/or Each GTIN level. Company A is Information Provider, Brand Owner, and Packer.

This is an example of a navel packer packing under its own label.

Package Description	GTIN	Product Description- Short	Information Provider GLN	Information Provider	Brand Owner GLN	Brand Owner	Manufacturer / PackerGLN	Manufacturer/Packer

### Attribute: *isTradeltemAnOrderableUnit*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isTradeltemAnOrderableUnit	Is this packaging level the orderable level? Normally, this is YES if the level is the case.	YES	Y	N	N

### Guidance to consider:

*This attribute has specific code values to be used in data entry. See below.*

### *isTradeltemAnOrderableUnit* list:

Code Value
YES
NO

### Attribute: *isTradeltemAVariableUnit*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isTradeltemAVariableUnit	This is a Yes or No indicator to describe whether this product is a variable weight or a fixed weight.	YES	Y	N	N

### Guidance to consider:

*This attribute has specific code values to be used in data entry. See below.*

### *isTradeltemAVariableUnit* list:

Code Value
YES
NO

## Attribute: *isTradeltemABaseUnit*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isTradeltemABaseUnit	This is the lowest level of packaging which is published/shared.	YES	Y	N	N

### Guidance to consider:

*The produce industry is currently focused on case level identification, but plan for migration to the retail unit. If you do proceed to a lower level; i.e., the GS1 DataBar, you would need to come back to this field.*

*This attribute has specific code values to be used in data entry. See below.*

### *isTradeltemABaseUnit* list:

Code Value
YES
NO

## Attribute: *isTradeltemAConsumerUnit*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isTradeltemAConsumerUnit	This indicator is populated when this GTIN level is marked so as to be processed across a point of sale system for sale to an end user.	NO	Y	N	N

### Guidance to consider:

*An example of this for produce would be clementine oranges, where the case is the consumer unit. This attribute has specific code values to be used in data entry. See below.*

### *isTradeltemAConsumerUnit* list:

Code Value
YES
NO

## Attribute: *isTradeltemADespatchUnit*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isTradeltemADespatchUnit	An indicator identifying that the information provider considers the trade item as a despatch (shipping) unit.	YES	Y	N	N

### Guidance to consider:

Prevents ordering in retail units (e.g., Bagged Salad). This attribute has specific code values to be used in data entry. See below.

### *isTradeltemADespatchUnit* list:

Code Value
YES
NO

## Attribute: *isTradeltemAnInvoiceUnit*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isTradeltemAnInvoiceUnit	This indicator is populated when this GTIN level can appear on an invoice from the Information Provider to the recipient.	YES	Y	N	N

### Guidance to consider:

*This attribute has specific code values to be used in data entry. See below.*

### *isTradeltemAnInvoiceUnit* list:

Code Value
YES
NO

## Attribute: *isPackagingMarkedReturnable*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isPackagingMarkedReturnable	This refers to the packaging for this GTIN level, and not the product itself. This is the empty shipping container, primarily. For produce in the RPC, the RPC is returnable so the value here would be YES.	YES	Y	N	N

### Guidance to consider:

For produce in an RPC, the RPC is returnable so the value here would be YES. NOTE: RPC is not currently a code value for packaging type code for an RPC. The packagingTypeCode for an RPC is KTB.

This attribute has specific code values to be used in data entry. See below.

### *isPackagingMarkedReturnable* list:

Code Value
YES
NO

## Attribute: *isNonSoldTradeltemReturnable*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isNonSoldTradeltemReturnable	This is an indicator that any product which is not sold can be returned.	NO	Y	N	N

### Guidance to consider:

*An example of this would be guaranteed sales.*

*This attribute has specific code values to be used in data entry. See below.*

### *isNonSoldTradeltemReturnable* list:

Code Value
YES
NO

### Attribute: *isTradeltemMarkedAsRecyclable*

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Boolean (Yes/No)	isTradeltemMarkedAsRecyclable	Trade item has a recyclable indication marked on it. This may be a symbol from one of many regional agencies.	NO	Y	N	N

#### Guidance to consider:

*This attribute has specific code values to be used in data entry. See below.*

#### *isTradeltemMarkedAsRecyclable* list:

Code Value
YES
NO

## Attribute: descriptionShort

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Multidescription (Allows for a language qualifier) (1 to 35 characters) Free Text	descriptionShort	A free form short length description of the trade item that can be used to identify the trade item at point of sale. The schema uses common library component as shown in the GDD Max Size field. For the business requirements for item, please use the specific definition of this data type and field.	Red Seedless Watermelon	Y	N (based on trade item agreement)	N

### Guidance to consider:

*Consider that a lot of retailers build their point of sale systems off of this definition. It is a very short description and is what prints on the bill of sale. In this case, this refers to item level.*

*If populated, it also requires the population of functionalName.*

## Attribute: ingredientSequence

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Integer (12 Characters)	ingredientSequence	This is an Integer (1; 2; 3 . . .) indicating the ingredient order by content percentage of the product. (major ingredient = 1; second ingredient = 2) etc.	Example of ingredientSequence	Y	N	N

### Guidance to consider:

*Ingredients must be listed in descending order of proportion by weight, as determined before they are combined to make the product. The ingredient list must be shown in both English and French unless otherwise exempted by the Food and Drug Regulations [B.01.008, B.01.012].*

*Canada and U.S. are harmonized with the exception for language requirements.*

*This attribute is mandatory if Class is invoked. If populated requires the population of ingredientName.*

*Please refer to the example below for data entry. This field is used whether you have one ingredient or multiple ingredients, packaged or unpackaged.*

### ingredientSequence examples:

#### For a GTIN with only one ingredient

GTIN is a Head of Iceberg Lettuce	
Attribute	Value
ingredientSequence	1
ingredientName	Iceberg Lettuce

*\* Attributes are repeated as a group for as many ingredients as are necessary for the GTIN.*

#### For a GTIN with more than one ingredient

GTIN is a bag of Salad Mix*	
Attribute	Value
ingredientSequence	1
ingredientName	Romaine Lettuce
ingredientSequence	2
ingredientName	Red Cabbage
ingredientSequence	2
ingredientName	Red Cabbage

## Attribute: ingredientName

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (70 Characters) (Free Text)	ingredientName	Text field indicating one ingredient or ingredient group (according to regulations of the target market). Ingredients include any additives (colorings; preservatives; e-numbers; etc.) that are encompassed.	Example of ingredientName	Y	N	N

### Guidance to consider:

Mandatory if Class is invoked. If populated requires the population of ingredientSequence.

This field is used whether you have one ingredient or multiple ingredients.

### ingredientName examples:

#### For a GTIN with only one ingredient

GTIN is a Head of Iceberg Lettuce	
Attribute	Value
ingredientSequence	1
ingredientName	Iceberg Lettuce

#### For a GTIN with more than one ingredient

GTIN is a bag of Salad Mix*	
Attribute	Value
ingredientSequence	1
ingredientName	Romaine Lettuce
ingredientSequence	2
ingredientName	Red Cabbage
ingredientSequence	3
ingredientName	Carrots

\* Attributes are repeated as a group for as many ingredients as are necessary for the GTIN.

## Attribute: ingredientStatement

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Text (5000 character free text)	ingredientStatement	Information on the constituent ingredient makeup of the product specified as one string. Can only occur one time per GTIN.	May contain any or all of the following ingredients.	Y	N	N

### Guidance to consider:

*This field is a free text field to be used to put the statements such as 'May contain any or all of the following ingredients' due to seasonal or weather related issues with ingredients.*

## Attribute: packagingMaterialCode

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	packagingMaterialCode	The code identifying the type of package used as a container of the trade item.	79	Y	N	N

### Guidance to consider:

*This attribute has specific code values to be used in data entry. See below.*

### packagingMaterialCode list:

Value	Name	Definition	Current or Future	Being Replaced by
99	Bio-Plastic	Bio-plastic: Plastic certified as compliant with the European norm EN13432 over being recyclable through disintegration or biodegradation.	Current	BIO_PLASTIC
7	Burlap	Burlap: The American name for cloth woven from jute fibres. In other parts of the world it is known as Hessian, Hessian cloth, or gunny from the Indian gain.	Current	BURLAP
102	Composite	Composite: A material that is made from multiple materials.	Current	COMPOSITE
103	Corrugated	Corrugated: A non specific paperboard that has been drawn or bent into folds or alternate furrows and ridges.	Current	CORRUGATED
104	Corrugated Board	Corrugated Board: A structure formed by one corrugated inner member glued to one flat facing paperboard; also termed single faced.	Current	CORRUGATED_BOARD
96	Double Wall Corrugated Board	Double Wall Corrugated Board: A structure formed by two corrugated inner members glued to one intervening flat facing paperboard with two additional paperboards to each outside corrugated.	Current	DOUBLE_WALL_CORRUGATED_BOARD
28	Double-wall Paper	Double-wall Paper	Current	PAPER

Value	Name	Definition	Current or Future	Being Replaced by
37	Fiberboard	Fiberboard	Current	PAPERBOARD
31	Fibre	Fibre: A non specific material made of a unit of matter, either natural or manufactured, that forms the basic element of fabrics and other textile structures.	Current	FIBRE
40	Fiberboard Metal	Fiberboard Metal	Current	METAL
34	Fibre (Paperboard)	Fibre (Paperboard)	Current	PAPERBOARD
3	Hard Wood	Hard Wood: A general term referring to any variety of broad-leaved, deciduous trees, and the wood from those trees. The term has nothing to do with the actual hardness of the wood; some hardwoods are softer than certain softwood (evergreen) species.	Current	HARDWOOD
106	Laminated Carton	Laminated Carton: A material made up of laminates of paperboard, foil and polyethylene which combined form a sheet suitable for aseptic processing.	Current	LAMINATED_CARTON
64	Molded Plastic	Molded Plastic	Current	PLASTIC
67	Multiple-wall Paper (2 or more walls)	Multiple-wall Paper (2 or more walls)	Current	PAPER
70	Multiple-wall Paper (3 or more walls)	Multiple-wall Paper (3 or more walls)	Current	PAPER
71	Not Otherwise Specified	Not Otherwise Specified: A non-specific material that can not be defined with the current material codes. Should be used as a temporary measure while a proper code is established for the type of material.	Current	OTHER
79	Plastic	Plastic: A non-specific material made of any of numerous organic synthetic or processed materials that are mostly thermoplastic or thermosetting polymers of high molecular weight and that can be made into objects, films, or filaments.	Current	PLASTIC
109	Polyethylene	Polyethylene terephthalate (PET): Polyethylene terephthalate is a thermoplastic polymer resin of the polyester family and is used in synthetic fibers. Can be applied to bottles, flasks and caps.	Current	PET
82	Pulpboard	Pulpboard: A grade of paperboard made with virtually no sizing and of relatively crude formation. It is usually of a lower density.	Current	PULPBOARD
95	Single Wall Corrugated Board	Single Wall Corrugated Board: A structure formed by one corrugated inner member glued between two flat facing paperboards; also termed double faced.	Current	SINGLE_WALL_CORRUGATED_BOARD

Value	Name	Definition	Current or Future	Being Replaced by
5	Soft Wood	Soft Wood: General term used to describe lumber produced from needle and/or cone bearing trees (Conifers).	Current	SOFTWOOD
97	Triple Wall Corrugated Board	Triple Wall Corrugated Board: The structure formed by four flat facings and three intermediate corrugated members	Current	TRIPPLE_WALL_CORRUGATED_BOARD
51	Wire Mesh	Wire Mesh	Current	WIRE
94	Wood	Wood: A non specific material made from the hard fibrous lignified substance under the bark of trees.	Current	WOOD

## Attribute: displayTypeCode

Data Type	Produce Industry Attribute Name	Produce Industry Definition	Example for attribute value entry	Initial Setup for EDI transactions (all dependent upon Item Maintenance (888) being required)	Transactional Fields for EDI (all dependent upon Item Maintenance (888) being required)	Necessary to be PTI Compliant
Code List	displayTypeCode	Code which will identify the type of display to be used in the retail store.	FDR	Y	N	N

### Guidance to consider:

*This attribute has specific code values to be used in data entry. See below.*

### displayTypeCode list:

Attribute	Value
SDR	Shelf Display Ready Packaging – A display unit that is ready for display on a shelf or counter.
FDR	Floor Display Ready Packaging – A display unit that is ready for display on the floor.
SND	Shelf Non-Assembled Display Packaging – A display unit that needs to be assembled before display on a shelf or counter.
FND	Floor Non-Assembled Display Packaging – A display unit that needs to be assembled before display on the floor Products types that were originally associated with unit descriptors MX and DS would use this attribute if they were display type.
UNS	Unspecified for cases where the supplier is unable to provide the precise type at that moment (or the type of display does not exist in the list yet), but still wants to communicate a display of a sort is present.
