

Nutrition Facts: Most Commonly Consumed Fruits & Vegetables in Canada

On December 14th, 2016 Health Canada published final regulatory amendments to the *Food and Drug Regulations* in *Canada Gazette, Part II*. The regulations came into force immediately and there will be a **transition period of 5 years from the date of the publication** to enable compliance. As of December 14, 2021 all regulations in the amendments will be required, including the use of the new Nutrition Facts Table format when one is presented.

Important to note: during the five year transition period beginning on December 14, 2016, regulated parties must comply with either the former or the new labelling requirements; it is not permitted to partially comply with both sets of labelling requirements. If a regulated party chooses to implement one or more of the new labelling requirements, it is their responsibility to ensure that all new labelling requirements are followed as well (E.g. prescribed Nutrition Facts Table (NFT) , ingredient lists etc.)

Please note that a full transition to the new format NFT must be made by December 14, 2021.

Please [click here](#) for more information on the 2016 FDR amendments to read PRIOR to use of the data in the *Nutrition Facts: Most Commonly Consumed Fruits and Vegetables in Canada*.

The values and eligible nutrient content claims in this document, for each of the commodities included, are based on the values that were calculated for use in NFT table formats that were prescribed under the regulations before the publication of the amendments to the FDR (noted above) and may still be used until December 14, 2021 per the conditions in the important note above

The allowable health and **nutrient content claims** and nutrient values for use in Canadian Nutrition Facts tables (NFTs) in the formats prescribed by the new regulatory amendments will be available soon.

Before using the data and claims provided in this document to develop Nutrition Facts Tables (NFT) for use on eligible prepackaged fresh fruits and vegetable products or to provide nutrition information at retail, please refer to the final page of this document. The final page provides information related to the asterisks indicated, as well as other important information you need to be aware of before proceeding.

Apple		Amount per Serving		
Serving Size:	Nutrients	Amount	% DV	Eligible Nutrient Content Claims*

* All Eligible nutrient content claims shall relate to all foods of that type and not only the specified food e.g "carrots are low in calories" or "all carrots are low calorie".

** A Disease Risk Reduction Claim "A healthy diet rich in a variety of vegetables and fruit may help reduce the risk of some types of cancer" is allowed for fresh fruits and vegetables, a vegetable or fruit juice, **except potatoes, yams, cassava, plantain, corn, mushrooms, legumes and their juices.**"

Note:

The nutrition data provided in this Nutrition Facts for the Most Commonly Consumed Fresh Fruits and Vegetables in Canada, has been adapted from USFDA and other reliable data for voluntary use in NfT table formats that were prescribed under the regulations **before the 2016 publication of the amendments to the FDR** or to provide nutrition information at retail. The serving sizes, calculations and allowable nutrient content claims have been determined under the direction of Health Canada.

The CPMA makes every effort to ensure that reliable information is provided but cannot accept any responsibility for any errors or omissions no matter how caused.

A label owner is responsible for the accuracy of their label values, therefore, it is important that all pertinent acts and regulations be consulted prior to developing package and nutrition labelling for the Canadian marketplace.

CPMA shall not be liable for any damages, loss, expense or claim of loss arising from the use, or reliance on the information.

CPMA would like to thank Health Canada and their staff from the Food Directorate's Bureau of Nutritional Sciences, Nutrition Regulations and Standards Division and the Nutrition Research Division for their valued support, direction and assistance with this project.
