

About *My CFIA*:

Your access to services online

***My CFIA* – A new way of doing business with us**

At the CFIA we've been working at building an innovative suite of services online where you can view and manage your transactions anywhere, anytime.

By creating your own *My CFIA* secure web-based account, you'll have easy access to a growing list of services online including information services, licences, permits, registrations and export certificates.

What services are available through *My CFIA*?

Starting in January 2017, dairy establishments will be able to apply for or renew their dairy establishment registrations online.

Through 2017, more services will be added and more industry sectors will have access to services online. To find out what services will be available over the coming months, visit inspection.gc.ca/MyCFIA.

Is *My CFIA* right for you?

Whether you are an individual, small business or large producer doing business with us, you can sign up for a *My CFIA* account to access CFIA services at your convenience.

Enrolling is easy and a one-time enrolment process means your profile, or that of your business, will be used for any future online service request with the CFIA.

Enrol early so you can take advantage of the services you use as soon as they become available online.

For more information about *My CFIA*, visit inspection.gc.ca/MyCFIA in January 2017.
